

RITU CHITTIMALLE

Frontend Developer (React.js) | Full Stack (MERN)

📍 Thane, Maharashtra | 📞 +91-7249138123 | ✉️ rituchittimalle@gmail.com | 💻 [ritu-chittimalle-dev](https://github.com/ritu-chittimalle-dev) | 🌐 [Ritu21055](https://ritu21055.github.io)

Summary

Fresher Full Stack (MERN) developer with a frontend focus, graduated 2026. Specializes in building responsive, component-driven interfaces with React.js and JavaScript (ES6+), backed by working knowledge of REST API design, JWT authentication, and MongoDB data modeling. Comfortable owning a feature end-to-end — from UI to the API it talks to — with two full-stack applications built and deployed to production.

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI Design, Component-Driven Development, Context API.

API Integration: RESTful API Integration, Axios, JSON, Postman, Third-Party APIs (Cloudinary, Multer).

Backend Exposure: Node.js, Express.js, REST API Design, JWT Authentication and Authorization.

Database: Mongoose, MongoDB.

Deployment & Tools: Vercel, Render, MongoDB Atlas, Git, GitHub, Postman, SDLC, Debugging.

Projects

LendLoop – Peer-to-Peer Rental Marketplace | *Full Stack (MERN)*

- [Live Site](#) | [GitHub](#)
- Built a fully responsive **React.js** frontend, including product listing pages, a booking flow, and a 4-step simulated payment workflow.
- Designed reusable **React** components for rental duration selection, booking status tracking (Pending, Approved, Rejected), and automatic cost calculation with real-time UI updates.
- Integrated **Cloudinary** on the frontend for image upload and preview; connected to a **Node.js/Express.js** backend via **REST** endpoints across 3 route modules (User, Product, Booking).
- Deployed frontend to **Vercel** and backend to **Render** with **MongoDB Atlas**, with the application live and reachable end-to-end at the links above.

ShelfSense – Smart Expiry Tracking & Inventory Monitoring | *Full Stack (MERN)*

- [Live Site](#) | [GitHub](#)
- Developed a responsive **React** dashboard with 5 real-time analytics cards (Total, Safe, Expiring Soon, Urgent, Expired), automated expiry alerts, and product management shortcuts.
- Built dynamic UI components for product search and real-time expiry classification across 4 categories, rendering **JSON** data from the backend.
- Integrated 8 **RESTful API** endpoints on the frontend using **JWT**-authenticated requests across 4 protected routes for secure, user-specific inventory data.
- Deployed frontend to **Vercel** and backend to **Render** with **MongoDB Atlas**; live and reachable end-to-end at the links above.

Certifications

- **Legacy Responsive Web Design V8 – freeCodeCamp (2025):** 300+ hour certification, 20+ projects covering accessibility, layout, and modern CSS.
- **Web Development Fundamentals – IBM SkillsBuild (2025):** Structured training in HTML, CSS, JavaScript, and professional web development workflows.

Education

B.E Computer Engineering

Graduated: 2026
