

RITU CHITTIMALLE

MERN Stack Developer

📍 Thane, Maharashtra | 📞 +91-7249138123 | ✉ rituchittimalle@gmail.com | 💻 [ritu-chittimalle-dev](https://github.com/ritu-chittimalle-dev) | 🌐 [Ritu21055](https://ritu21055.github.io)

Summary

Fresher MERN Stack developer, graduated 2026. Builds full-stack applications end-to-end — MongoDB schema design, REST API and business logic in Node.js/Express.js, and React.js interfaces on the frontend. Comfortable owning a feature from database to UI, with two full-stack applications built and deployed to production, including authentication, protected routes, and third-party API integration.

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI Design, Component-Driven Development, Context API.

Backend: Node.js, Express.js, REST API Design, MVC Architecture, JWT Authentication and Authorization.

Database: MongoDB, Mongoose.

API & Integration: RESTful API Integration, Axios, JSON, Postman, Third-Party APIs (Cloudinary, Multer).

Deployment & Tools: Vercel, Render, MongoDB Atlas, Git, GitHub, SDLC, Debugging.

Projects

LendLoop – Access Economy Platform | *Full Stack (MERN)*

March 2026 – May 2026

- [Live Site](#) | [GitHub](#)
- Built a full-stack MERN rental platform across 3 backend route modules (User, Product, Booking), with **MongoDB** schemas supporting authentication, product listings, and booking management.
- Implemented the booking lifecycle in **Node.js/Express.js**: rental duration selection, status tracking (Pending, Approved, Rejected), automatic cost calculation, and a 4-step simulated payment workflow.
- Integrated **Cloudinary** and **Multer** for cloud-based image management on the frontend; deployed the full-stack application to **Render** and **MongoDB Atlas**, live and reachable end-to-end at the link above.

ShelfSense – Smart Expiry Tracking & Inventory Monitoring | *Full Stack (MERN)*

April 2025 – July 2025

- [Live Site](#) | [GitHub](#)
- Built a full-stack MERN inventory monitoring platform with automated shelf-life calculation, classifying products across 4 expiry states (Safe, Expiring Soon, Urgent, Expired).
- Implemented **JWT**-based authentication and authorization across 4 protected routes, alongside product search and real-time expiry alerts across 8 **RESTful API** endpoints.
- Designed a responsive **React** dashboard with 5 real-time analytics cards (Total, Safe, Expiring Soon, Urgent, Expired); deployed frontend to **Vercel** and backend to **Render** with **MongoDB Atlas**, live and reachable end-to-end at the link above.

Certifications

- **Legacy Responsive Web Design V8 – freeCodeCamp (2025):** 300+ hour certification, 20+ projects covering accessibility, layout, and modern CSS.
- **Web Development Fundamentals – IBM SkillsBuild (2025):** Structured training in HTML, CSS, JavaScript, and professional web development workflows.

Education

B.E Computer Engineering

Graduated: 2026
